

Heartless Wheels

The Voodoo Purple/86A (great for extra grip on slick surfaces)

Stalker Black/88A Good grip on uncoated surfaces. A great push wheel

Creeper Green/90A
Good grip on sport tile, banked track and smooth coated concrete.

Chaser Yellow/92A
Chasers are for wood, coated floors, sport tile and banked tracks.

Breaker Red/94A
Breakers increase the speed on tight wood floors, clean sport tiling and grippy banked tracks.

Vanish White/96A
Vanish is hard + fast on wood or sport tile or for that little extra roll.

SURE GRIP CERAMIC

By far the best bearing money can buy. Sure Grip ceramic bearing is made to specific specifications and is said will outlast any bearing on the market.

5/16 only

SURE GRIP ABEC 9

Sure Grip ABEC 9 bearings is one of our newest bearings, a true ABEC 9. If you want the best performing bearing this side of a ceramic this is your bearing.

5/16 only

**What's the hardness rating mean?**

Sure-Grip uses the "A" rating when giving a wheel its hardness rating. There are several different ways to measure the hardness of a material, 12 in fact. The most common are "A" and "D." "A" is used for softer material and "D" for harder material. In roller-skating the higher the number, the harder the wheel. Outdoor wheels typically are between 78A - 88A, indoor wheels are typically between 90A - 100A.

What type of material are your wheels made out of?

We use a material called Poly BD in our Fugitive, Power, Power Plus, and Interceptor wheels; its a material that was developed 20 years ago but just seems to work the best in roller skating. It's a material that has high rebound, good grip, and good wear. There are two easy ways to tell if a wheel is truly made from Poly BD. One, the material has a distinct smell, in a way it smells bad. Two, tiny bubbles or holes will appear throughout the wheel.

What's the hardness of my wheels?

Sure-Grip offers many different types of wheels; each was manufactured for a specific purpose. With this in mind it is important to note that the hardness number alone does not necessarily mean that the wheel will be that soft or that hard. But to answer the question;

Fugitive wheels:

Black, Blue, Pink, and Red are 92A; Purple is 94A; Green is 96A.

Interceptor:

Black, Pink, Blue, Red, Yellow are 93A: Purple, Green are 97A

Power Plus:

Same as Interceptor

What's the difference between the metal hub and plactic hub?

Sure-Grip offers 3 wheels that feature an aluminum hub; they are the Power, Power Plus, and the Interceptor. All our other wheels feature a nylon hub. The difference is simple; one is harder than the other, which will in turn make the wheel itself feel harder. A wheel that is 95A will feel harder on an aluminum hub than on a nylon hub.

What wheel should I use for Roller Derby?

The wheel of choice in Roller Derby is the Fugitive wheel. The smaller nylon hub allows for more urethane to be poured around the hub, thus giving a softer feel. Among skaters the color of choice is the Blue Fugitive which is the softer of the colors.

COMING SOON

The 187 Pro Knee Pads. These "Killer Pads" from 187 were made specifically for vert skateboarding & pools. 187's orthopedic padding is substantial and includes Pro-core impact absorption to take the force of the spill rather than your knees! Dual density interior memory foam conforms to your knees; add to that the seams are turned in so they won't irritate your legs. These killer pads wrap high on your leg and over the knee so there is no way for the pads to slip down. Easy on/off - no need to remove your shoes!

- Dual density interior memory foam
- Seamless hinge for maximum flexibility
- Neoprene butterfly closure
- High-strength ballistic nylon
- Durable double-stitching along caps
- Replaceable caps
- **Sizing note: These pads run large, but you do want them to fit snug.**

Triple Eight Brainsaver Rubber Helmet with Sweatsaver Liner

Renowned Brainsaver rubber helmet is one of the best multi-impact helmets available. This helmet can be used as necessary protective gear for skateboarding, in-line skating ("rollerblading"), roller derby, scooter, and most roller sports. As well, at Triple Eight we know that sweating while skateboarding sucks, so our techies here listened to our top riders, went back to the drawing board and developed the patented Sweatsaver™ liner that helps eliminate the smells, the stinging and the eye blurring that occurs from sweat. Our revolutionary liner has moisture-wicking layers that limit sweat drippage, an anti-bacterial treatment to make it virtually stink proof, and a 360° wrap around design so that there is absolutely no liner separation. With our terry cloth construction, you can kiss that itchy head-feeling goodbye. Our Sweatsaver™ liner is standard in all rubberized helmets and pro helmets, and is also sold individually in sizes XS – XL.

Product Details:

- Multi-impact Design
- Sweatsaver™ liner comes standard
- Adjustable Straps
- Triple Eight Customized Logo Rivets
- Ideal for skateboarding, in-line skating ("rollerblading"), roller derby, scooter, and most roller sports
- Sizes – XS, Small, Medium, Large

Brainsaver Rubber Helmet Sizing Chart:

To ensure a perfect fit, measure the circumference of your head starting in the middle of your forehead and match it with the sizes below.

Triple Eight Hired Hands

One of Triple Eight's most popular protective gear items, this glove is fully padded with shock absorbing foam layers for maximum shock absorption and designed with top grain leather for style and durability. An EZ pull-on loop helps you slide your hand in, and a thick neoprene straps delivers a perfect fit. These gloves are ideal for skateboarding, inline skating (rollerblading), and roller derby use.

Product Details:

- Top and bottom removable / replaceable impact-resistant ABS splints add to the versatility of this glove
- EVA shock absorbing foam layers with double stitching for increased durability
- Thick neoprene support strap ensures a secure fit
- EZ pull on loop
- Ideal for skateboarding, inline skating (rollerblading), and roller derby
- Sizes – S, M, L, XL

Triple Eight Anti-Glove

The Triple Eight Anti-Glove provides the superior protection and support you expect from all Triple Eight products, but without the bulkiness of a more traditional glove. They have padded Kevlar® palms and come with terry cloth lining for a comfortable, sweat-absorbent fit. These gloves are ideal for skateboarding, inline skating (rollerblading), and roller derby use.

Product details:

- Just 5" in length
- Padded Kevlar® palm
- Neoprene body with terry cloth lining for a secure comfortable fit
- Thick support strap that wraps around entire wrist
- Replaceable plastic back splint for increased wrist protection
- Ideal for skateboarding, inline skating (rollerblading), and roller derby
- Sizes – S, M, L

Triple Eight KP 22 Knee Pads

Triple Eight's KP 22 Knee Pads are high end knee pads that offer significant protection for those skaters that need more padding for use in skate parks, and want to wear the best, most durable knee pads on the market. Our kneepads are perfect for skateboarding, inline skating (rollerblading), and roller derby use.

Product Details:

- Heavy duty EVA memory foam
- High-density, impact-resistant cap securely attached with reinforced rivets
- Neoprene butterfly closure
- Top elastic and bottom webbed adjustable straps
- Flat cap design for longevity and stability
- Ideal for skateboarding, inline skating (rollerblading) and roller derby
- Sizes – Jr, S, M, L
